Thanks,

Becky

TO PREPARE:

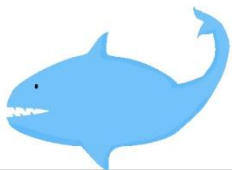

Laminate and cut out the number cards and game board. I use these during math centers so I make about 5 sets of game boards and cards. There are 32 cards total.

TO PLAY: {directions the same for both game boards}

Players pick ONE card to use during an **ENTIRE** trip around the board. The first player rolls the dice and moves their player piece that many spaces. He/she uses their number card to answer the question from the game board. If they answer correctly, they can stay in their spot. If they do **NOT** answer correctly, they need to go back to start. (If they answer incorrectly during the game, they move back to where they were before they rolled).

once a player reaches **"start"** again, they keep their card in a pile in front of them and they choose a new card from the pile. The game continues until there are no cards left, or the teacher calls time. The winner is the partner with the most cards.
